INDEX TO VOLUME 30

AUTHOR INDEX

Adams, D. F.
Monitoring-surveillance, 434
Adams, T. N.
Predictions of intrinsic ash emissions from wood-waste boilers, 147
Albanese, A. S.
The global carbon dioxide problem: impacts of U. S. synthetic fuel- and coal-fired electricity generating plants, 353
Allard, D.
Intercomparison of visibility measurement methods, 134
Allie, S.
Stack sampling of organic compounds: application to the measurement of catalytic incinerator efficiency, 792
APCA TT-4 Committee on Odors
Comments on the NAS report: odors from stationary and mobile sources, 173
Arey, F.
Fluoride in the ambient air over the Pamlico estuary in North Carolina, 397
Aron, R.
Forecasting high level oxidant concentrations in the Los Angeles Basin, 1227
Bakke, E.
Application of lime/limestone flue gas desulfurization process to smelter gases, 1157
Beale, J. S.
CMA newsletter, 218
CMA newsletter, 634
CMA newsletter, 964
CMA newsletter, 1280
Beery, W. T.
Report on the eighth APCA government affairs seminar "environmental quality—energy quantity", 643
Bellin, P.
Indoor and outdoor carbon monoxide measurements at an airport, 392
Bethea, R.
Comments on the NAS report: odors from stationary and mobile sources, 173
Bickelhaupt, R. E.
An interpretation of the deteriorative performance of hot-side precipitators, 882
Black, F. M.
Composition of automobile evaporative and tailpipe hydrocarbon emissions, 1216
Blasko, T. J.
Organic content of particulate matter in turbine engine exhaust, 261
Blosser, R. O.
Information on the sulfur content of bark and its contribution to SO_2 emissions when burned as a fuel, 769
Bos, R.
Automatic measurement of atmospheric ammonia, 1222
Boubel, R. W.
Sampling submicrometer particles suspended in near sonic and supersonic free jets, 898
Boyle, T. J.
Evaluation of Kraft process pollution abatement strategies by time series analysis of makeup records, 82
Brachaczek, W. W.
Artifact formation of sulfate, nitrate, and hydrogen ion on backup filters: Allegheny Mountain experiment, 30
Brown, D. F.
ICP/AES analysis and the composition of airborne and soil materials in the vicinity of a lead/zinc smelter complex, 257
Brown, G. L.
Air quality impact associated with a sour gas well blowout in South Western Alberta, 787
Bundy, R. P.
Operation and maintenance of fabric filters, 754
Buonicore, A. J.
Control of fly ash from conventional coal-fired utility boilers, 602
Butler, J. W.
Artifact formation of sulfate, nitrate, and hydrogen ion on backup filters: Allegheny Mountain experiment, 30
Cadle, S. H.
The Denver winter aerosol: a comprehensive chemical characterization, 1194
Cahill, T. A.
Contamination of the Lake Tahoe air basin by high molecular weight petroleum residues, 387
Electrostatic effects on gravimetric analysis of membrane filters, 391
Cain, M. B.
Reaction of nahcolite with sulfur dioxide, 1229
Cain, W. S.
The case against threshold measurement of environmental odors, 1295
Calvert, S.
Spray charging and trapping scrubber for fugitive particle emission control, 1208
Carpenter, R. L.
Fly ash from electrostatic precipitators: characterization of large spheres, 679
Cha, S. S.
Consideration of physical factors in dynamic olfactometry, 1294
Chamblee, J. W.
Fluoride in the ambient air over the Pamlico estuary in North Carolina, 397
Chang, T. Y.
NO_2 air quality—precursor relationship: an ambient air quality evaluation in the Los Angeles basin, 157
Urban-center CO air quality projections, 1022
Chock, D. P.
Comment on "a new model for estimating concentrations of substances emitted from a line source", 52
Clark, R. D.
Fly ash from electrostatic precipitators: characterization of large spheres, 679
Colwill, D. M.
Exposure of drivers to carbon monoxide, 1316
Cooper, D. W.
An inventory of particulate emissions from open sources, 1298
Energy consumption reduction using two-stage venturi scrubbers, 1130
Cooper, J. A.
Environmental impact of residential wood combustion emissions and its implications, 855
Receptor oriented methods of air particulate source apportionment, 1116
Costle, D. M.
A law in trouble? 844
New ways to regulate: the bubble policy, 10
PSD—an opportunity, 1072
Visibility protection—a proposal, 632
Countess, R. J.
The Denver winter aerosol: a comprehensive chemical characterization, 1194
Cowherd, C.
The technical basis for a size-specific particulate standard—workshop summaries from a two part specialty conference, 971
Crawford, T. L.
Sulfate flux through the Tennessee Valley region, 1230
Crenshaw, J. A.
Single sources in class II PSD areas, 44
Cruse, E. A.
Fans and fan systems, 939
Culver, D. M.
The Plenary Session, 999
Curran, T. C.
An air quality data analysis system for interrelating effects, standards, and needed source reductions: part 6. calculating concentration reductions needed to achieve the new national ozone standard, 662
Daley, P. S.
Sampling submicrometer particles suspended in near sonic and supersonic free jets, 898
Dattner, S. L.
A method for rapid calculation of merchant vessel combustion emissions, 305
Davis, J. M.
Wind tunnel testing of open top field chambers for plant effects assessment, 905
DeAngelis, D. G.
EPA's research program for controlling residential wood combustion emissions, 862
Dennis, R.
Modeling concepts for pulse jet filtration, 38
De Paola, V.
Predicting cyclone efficiency, 1132
DeTar, D. F.
Further remarks on "a new model for estimating concentrations of substances emitted from a line source", 53
Dewald, H. D.
Reaction of nahcolite with sulfur dioxide, 1229
Diller, D. J.
Reaction of nahcolite with sulfur dioxide, 1229
Dimitriades, B.
Advances in the analysis of air contaminants a critical review—comments, 985
Doss, J. L.
Emissions from the use of emulsified asphalt in hot-mix batch plants in Indiana, 1352
Drapeau, J.
The Plenary Session, 999
Dravnieks, A.
Odor threshold measurement by dynamic olfactometry: significant operational variables, 1284
Drehmel, D. C.
Spray charging and trapping scrubber for fugitive particle emission control, 1208
Duffee, R. A.
Consideration of physical factors in dynamic olfactometry, 1294
Duncan, D. W.
A method for remote simultaneous sampling of high concentrations of gaseous HCl, 910
Edney, E. O.
Infrared and ultraviolet spectral study of HOCl, 50
Eisner, A.
Optimization of height of release of air pollutants, 400
Ellenbecker, M. J.
Impaction and particle bounce at high Stokes numbers, 1224
Theory for penetration in a pulse-jet cleaned fabric filter, 877
Ellis, H. M.
Comparison of predicted and measured concentrations for 58 alternative models of plume transport in complex terrain, 670
Ellison, A. H.
Advances in the analysis of air contaminants a critical review—comments, 985
Eltgroth, M. W.
Preliminary airborne observations of the Mt. St. Helens eruptions, 904
Engelbrecht, D. R.
Electrostatic effects on gravimetric analysis of membrane filters, 391
Englund, H. M.
Looking back, 110
Looking back, 350
Looking back, 640
Looking back, 841
Looking back, 1078
Looking back, 1273
Evans, D. W.
Trace element inputs from a coal burning power plant to adjacent terrestrial and aquatic environments, 567
Evans, J. S.
An inventory of particulate emissions from open sources, 1298
Farber, P. S.
Acid rain an international concern: an APCA panel presentation, 1089
Control of fly ash from conventional coal-fired utility boilers, 602
Feeney, P. J.
Electrostatic effects on gravimetric analysis of membrane filters, 391
Feldstein, M.
Comments on the NAS report: odors from stationary and mobile sources, 173
Findlay, R. L.
Air quality impact associated with a sour gas well blowout in South Western Alberta, 787

Finzi, C.
Multivariate stochastic models of sulphur dioxide pollution in an urban area, 1212
First, M. W.
Air pollution control association critical reviews program, 527
Honors and awards, 1039
Flachsbart, P. G.
An index and model of human response to air quality, 759
Fox, M. A.
A comparison of two techniques for the collection and analysis of polynuclear aromatic compounds in ambient air, 166
Frank, S. R.
Meteorology and the air pollution meteorologist, 1162
Franz, J. J.
Comments on the NAS report: odors from stationary and mobile sources, 173
Odor measurement by dynamic olfactometry, 1283
Frederick, E. R.
Fibers, electrostatics, and filtration: a review of new technology, 426
Frisch, N. W.
A technique for sizing electrostatic precipitators for highly variable fuels, 574
Fronza, G.
Multivariate stochastic models of sulphur dioxide pollution in an urban area, 1212
Gainer, J. G.
The behavior of buoyant merging plumes in the Rocky Mountain foothills, 782
Garvey, K. J.
Destruction of bacteria and toxic organic chemicals by a corona discharge, 277
Godson, W. L.
Research: a base for informed environmental protection, 735
Goklany, I. M.
Emission inventory errors for point sources and some quality assurance aspects, 362
Goldberg, R.
Department of Defense environmental opportunities, 89
Gotaas, Y.
Aircraft measurements in the gas cloud from the blowout at an oil platform in the North Sea, 789
Granett, A. L.
A method for remote simultaneous sampling of high concentrations of gaseous HCl, 910
Green, A. E. S.
Analytic extensions of the Gaussian Plume Model, 773
Groth, R. H.
Organic content of particulate matter in turbine engine exhaust, 261
Gruber, C. W.
Frank A. Chambers: 1885–1951, 402
Hall, R. E.
EPA's research program for controlling residential wood combustion emissions, 862
Hamlin, W. G.
A year of planning and program expansion, 1001
Hanst, P. L.
Infrared and ultraviolet spectral study of HOCl, 50
Hart, G. S.
Report on the Second APCA Canadian Government Affairs Seminar, 229
Harvey, T. M.
A comparison of polymer adsorbent and bag sampling techniques for paint bake oven odorous emissions, 22
Hawkins, D. G.
Control of airborne carcinogens, 346
Heckel, E.
Fluoride in the ambient air over the Pamlico estuary in North Carolina, 397
Hegg, D. A.
Preliminary airborne observations of the Mt. St. Helens eruptions, 904
Heidorn, K. C.
Errors in the measurement of soiling index due to variations in sampling tape thickness, 56
Herman, M. N.
Estimating long-term ground level concentrations of SO_2 from short-term peak data, 676
Hesketh, H.
Comments on the NAS report: odors from stationary and mobile sources, 173
Hickman, A. J.
Exposure of drivers to carbon monoxide, 1316
High, L. E.
Composition of automobile evaporative and tailpipe hydrocarbon emissions, 1216
Hobbs, P. V.
Preliminary airborne observations of the Mt. St. Helens eruptions, 904
Hoenig, S. A.
Destruction of bacteria and toxic organic chemicals by a corona discharge, 277
Horne, J.
Visibility Regulations, 120
Horton, J. H.
Trace element inputs from a coal burning power plant to adjacent terrestrial and aquatic environments, 567
Howatson, J.
Reaction of nahcolite with sulfur dioxide, 1229
Hoya, T. K.
Emissions from the use of emulsified asphalt in hot-mix batch plants in Indiana, 1352
Hunt, W. F., Jr.
An air quality data analysis system for interrelating effects, standards, and needed source reductions: part 6. calculating concentration reductions needed to achieve the new national ozone standard, 662
Hutcheson, R.
Alabama Electric Cooperative flue gas desulfurization operating and maintenance experience, 744
Jarke, F.
Odor threshold measurement by dynamic olfactometry: significant operational variables, 1284
Javitz, H. S.
Statistical interdependencies in the ozone National Ambient Air Quality Standard, 58
John, W.
A cyclone for size-selective sampling of ambient air, 872
Johnson, C. A.
Alabama Electric Cooperative flue gas desulfurization operating and maintenance experience, 744
Johnson, I.
Hydration enhanced sulfation of limestone and dolomite in the fluidized-bed combustion of coal, 684
Johnson, J. L.
Detection of leaded gasoline usage in catalyst-equipped vehicles: color test for lead in tail pipe deposits, 1232
Johnson, R.
Comments on the NAS report: odors from stationary and mobile sources, 173
Johnson, W. B.
The impact of stratospheric ozone on tropospheric air quality, 1009
Kaplan, I. R.
Organic compounds in urban atmospheres: a review of distribution, collection and analysis, 1098
Karlsson, H. T.
Technical aspects of lime/limestone scrubbers for coal-fired power plants: part I: process chemistry and scrubber systems, 710
Technical aspects of lime/limestone scrubbers for coal-fired power plants part II: instrumentation and technology, 822
Kats, G.
Effects of SO_2 and/or NO_2 on native plants of the Mojave desert and Eastern Mojave-Colorado desert, 1304
Katz, J.
Factors affecting resistivity in electrostatic precipitation, 195
Katz, M.
Advances in the analysis of air contaminants: a critical review, 528
Advances in the analysis of air contaminants a critical review—closure, 996
Keenan, M. T.
An evaluation of some commonly used highway dispersion models, 239
Suggestions for improvement of the EPA-HIWAY model, 247
Kelley, L. M.
Destruction of bacteria and toxic organic chemicals by a corona discharge, 277
Kenson, R.
Comments on the NAS report: odors from stationary and mobile sources, 173
King, W. R.
Siting ambient air particulate samplers near dirt roads, 275
Klemm, H. A.
Modeling concepts for pulse jet filtration, 38
Kneip, T. J.
Aerosols: anthropogenic and natural–sources and transport–summary of a conference, 358
Long-term trends in total suspended particulates, vanadium, manganese, and lead at near street level and elevated sites in New York City, 153
Komanoff, C.
Pollution control improvements in coal-fired electric generating plants: what they accomplish, what they cost, 1051
Korniski, T. J.
Artifact formation of sulfate, nitrate, and hydrogen ion on backup filters: Allegheny Mountain experiment, 30
Krauss, H. J.
A comparison of two techniques for the collection and analysis of polynuclear aromatic compounds in ambient air, 166

SUBJECT INDEX

Abrasives Industry
Analysis of an APCA baghouse operation and maintenance survey, 1255
Absorption
Automatic measurement of atmospheric ammonia, 1222
Reaction of nahcolite with sulfur dioxide, 1229
Acid Rain
See also Rain
Acid rain an international concern: an APCA panel presentation, 1089
Acid rain, Canada, and the coal conversion program, 456
Acid rain—the crossroads for decision making, 106
A law in trouble? 844
We slew the dragons, 959
Adsorbers
A comparison of polymer adsorbent and bag sampling techniques for paint bake oven odorous emissions, 22
Design of adsorption equipment in air pollution control, 1348
Aerial Sampling
Aircraft measurements in the gas cloud from the blowout at an oil platform in the North Sea, 789
The behavior of buoyant merging plumes in the Rocky Mountain foothills, 782
Aerosols
Aerosol contamination from high-volume sampler exhaust, 169
Aerosols: anthropogenic and natural–sources and transport–summary of a conference, 358
Energy consumption reduction using two-stage venturi scrubbers, 1130
Sampling submicrometer particles suspended in near sonic and supersonic free jets, 898
Aerosol Sampling
Advances in the analysis of air contaminants a critical review—comments, 985
Agricultural Aspects
An inventory of particulate emissions from open sources, 1298
Aircraft Emissions
Organic content of particulate matter in turbine engine exhaust, 261
Sampling submicrometer particles suspended in near sonic and supersonic free jets, 898
Aircraft Observations
Preliminary airborne observations of the Mt. St. Helens eruptions, 904
Air Curtains
Spray charging and trapping scrubber for fugitive particle emission control, 1208
Air Movement and Control Association Inc. (AMCA)
Fans and fan systems, 939
Air Pollutants
Midway Coal Company v. Commonwealth of Pennsylvania, Department of Environmental Resources, 1169
Air Pollution Control
Design of adsorption equipment in air pollution control, 1348

Toxicity
Fly ash from electrostatic precipitators: characterization of large spheres, 679
Organic compounds in urban atmospheres: a review of distribution, collection and analysis, 1098
Toxicology
Odors from stationary and mobile sources: executive summary, 13
Trace Analysis
Trace element inputs from a coal burning power plant to adjacent terrestrial and aquatic environments, 567
Trace Metals
Trace element inputs from a coal burning power plant to adjacent terrestrial and aquatic environments, 567
Tracers
Atmospheric tracer techniques and gas transport in the primary aluminum industry, 558
Estimating long-term ground level concentrations of SO_2 from short-term peak data, 676
Training
Short course training in air pollution control, 17
Transboundary Air Pollution
Acid rain, Canada, and the coal conversion program, 456
Report on the Second APCA Canadian Government Affairs Seminar, 229
Transmissometer
Evaluation of an infrared transmissometer for monitoring particulate mass concentrations of emissions from stationary sources, 382
Intercomparison of visibility measurement methods, 134
Transmittivity
Errors in the measurement of soiling index due to variations in sampling tape thickness, 56
Transport
See Pollutant Transport
Transportation
Phillips Petroleum Company v. Illinois Environmental Protection Agency, 95
Trend Analysis
Long-term trends in total suspended particulates, vanadium, manganese, and lead at near street level and elevated sites in New York City, 153
Troposphere
The impact of stratospheric ozone on tropospheric air quality, 1009
Vertical ozone profile in the lower troposphere over Chicago, 794
Tube Furnace
Hydration enhanced sulfation of limestone and dolomite in the fluidized-bed combustion of coal, 684
Turbines
Organic content of particulate matter in turbine engine exhaust, 261
Ultraviolet Absorption
A comparison of two techniques for the collection and analysis of polynuclear aromatic compounds in ambient air, 166
Infrared and ultraviolet spectral study of HOCl, 50
United States
A law in trouble? 844
Urban Models
See also Models
Contribution of mobile sources to ambient particulate concentrations in a downtown urban area, 777
Multivariate stochastic models of sulphur dioxide pollution in an urban area, 1212
Seasonal variability of the simple urban dispersion model, 35
Urban-center CO air quality projections, 1022
Urban Pollutant Levels
Exposure of drivers to carbon monoxide, 1316
Organic compounds in urban atmospheres: a review of distribution, collection and analysis, 1098
Siting ambient air particulate samplers near dirt roads, 275
Urban Problems
Clean air and economic development: an urban initiative, 1187
Urban Sources
Aerosols: anthropogenic and natural–sources and transport–summary of a conference, 358
Utility Industry
Analysis of an APCA baghouse operation and maintenance survey, 1255
Vanadium
Long-term trends in total suspended particulates, vanadium, manganese, and lead at near street level and elevated sites in New York City, 153
Vegetation Effects
A bioassay for assessing the effect of sulfur dioxide on oat seedlings, 163
Effects of SO_2 and/or NO_2 on native plants of the Mojave desert and Eastern Mojave-Colorado desert, 1304
Fluoride in the ambient air over the Pamlico estuary in North Carolina, 397
Wind tunnel testing of open top field chambers for plant effects assessment, 905
Ventilation
Modeling of radon and its daughter concentrations in ventilated spaces, 1201
Venturi Scrubbers
Application of lime/limestone flue gas desulfurization process to smelter gases, 1157
Energy consumption reduction using two-stage venturi scrubbers, 1130
Visibility
Air pollution and visibility: selected papers from an APCA specialty meeting, 117
An index and model of human response to air quality, 759
Human perception of visual air quality, 122
Intercomparison of visibility measurement methods, 134
Plume blight visibility modeling with a simulated photograph technique, 131
Power plant impacts on visibility in the West: siting and emissions control implications, 142
Protection against visibility impairment under the Clean Air Act, 118
Visibility protection—a proposal, 632
Visibility Regulations, 120
Visibility terms, 121
Visual Observations
Human perception of visual air quality, 122
Volcanic Pollution
Preliminary airborne observations of the Mt. St. Helens eruptions, 904
Water Pollution
Selenium: a water pollutant from flue gas desulfurization, 1134
Water Quality
The cost of clean air and water: U.S. EPA report to the Congress, 60
Trace element inputs from a coal burning power plant to adjacent terrestrial and aquatic environments, 567
Water Vapor
A simple procedure for calculating atmospheric water vapor concentration, 394
Wind Effects
Analytic extensions of the Gaussian Plume Model, 773
An inventory of particulate emissions from open sources, 1298
Conditions for maximum concentration, 274
Multivariate stochastic models of sulphur dioxide pollution in an urban area, 1212
Wind Tunnels
A new real-time isokinetic dust mass monitoring system, 1018
Wind tunnel testing of open top field chambers for plant effects assessment, 905
Winter Aerosol
The Denver winter aerosol: a comprehensive chemical characterization, 1194
Wisconsin
Elevated ozone concentrations measured downwind of the Chicago-Gary urban complex, 911
Wood Burning
Environmental impact of residential wood combustion emissions and its implications, 855
EPA's research program for controlling residential wood combustion emissions, 862
Information on the sulfur content of bark and its contribution to SO_2 emissions when burned as a fuel, 769
Predictions of intrinsic ash emissions from wood-waste boilers, 147
Wood Waste
Information on the sulfur content of bark and its contribution to SO_2 emissions when burned as a fuel, 769
Worst Case Projections
Standard Oil Company of California v. Air Pollution Control Officer of the Bay Area Air Pollution Control District, 1362
Zinc
ICP/AES analysis and the composition of airborne and soil materials in the vicinity of a lead/zinc smelter complex, 257
